FINPOWER

Your Trusted Cooling Partner

An ISO 9001:2015, 45001:2018, 14001:2015 certified, we are a global leader in the development of high-efficiency and energy saving Air Conditioning and Ventilation products for commercial and residential applications.

With almost 2 decades of experience in the HVAC market, Maxell Group is a trusted name that supplies innovative and efficient climate control products in the MENA region, designed and manufactured by our talented engineers.

ORGANISATION CHART

OUR VALUES

Who we are & What we are

OUR VALUES

Creativity

Reliability

Consistency

Sustainability

Commitment

Innovation

Creativity

Formulating original ideas, designs and products to add value to our customers.

Consistency

Consistency in quality, focus, commitment, products, services and performance and people.

Commitment

We are focused on creating mutually beneficial relationships, committed to our environment, employees, stakeholders, customers and quality.

Reliability

Our core value lies in the reliability of providing high customer satisfaction, quality products, service and our employees.

Sustainability

A value deeply rooted in our organization, we believe that we have an important role in protecting our environment and securing long term sustainability for the future.

Innovation

Innovation is the key to long term success and we have created an innovation friendly environment in our organization. We are passionate about developing and designing innovative solutions to challenging issues.

OUR VISION

OUR VISION

Value to our customers

Keep in pace with the latest technical developments

Co-exist with a healthy environment & conserve energy

Support and services that exceeds customer expectations

TESTIMONIAL

From Guru of Retail Start-up

"We would like to thank Finpower for your continual support and contribution to the success of our business. 2015 was a challenging year for us with the opening of over 400 stores and introduction of new brands and 2016 looks far more challenging. Hence, we can only continue to achieve this growth with the continuous support of your team. On behalf of the Alshaya retail property team, a very big Thank You and we look forward to continuing our successful relationship for many years to come."

- John Hadden

Senior VP- Retail Property , M.H.Alshaya Co.

KEY ADVANTAGES

What our customers can benefit from

Customization

We focus on providing a need based solution to our customers that will offer them the perfect fit for their needs. Thus resulting in options for high levels of customization.

Cost Effective

Customers can access our wide range of standard and customized high quality offerings at the most affordable and cost effective price ranges.

Quicker Deliveries

We procure most of our raw materials locally, this ensures that we are able to complete our production and testing quickly. This in turn helps us to ensure timely deliveries to our customers.

Dedicated Team

We have a dedicated sales and application team that can aid you in choosing the right offering from our wide product portfolio. Their approach and expertise can make your buying process easy and convenient.

Service Support

Our team of skilled service personnel will provide you with the best after sales and service support that can be availed 24x7 by our customers.

Wide Range of Products

Customers can access our wide range of standard and customized high quality offerings at the most affordable and cost effective price ranges.

OUR FORTES

Manufacturing Strength

Employs some of the most highly advanced & modern machinery

Has 2 state of the art manufacturing facilities (UAE & India)

Some of our machineries include:

- CNC Sheet Cutting Machines (AMADA & FINN POWER)
- Puffing Machine
- Bending CNC
- Fin press
- Bullet Expansion
- Advanced Refrigerant Charging Machine

We have a complete in-house manufacturing that enables us to control the complete process, ensuring quality and performance.

CNC Cutting Machine-AMADA

CNC Cutting Machine- FINN POWER

Manufacturing Strengths- Machinery- Dubai, UNITED ARAB EMIRATES

AMADA JAPAN CNC	Welding Machines
AMADA JAPAN Bending CNC	Compressors
FINN POWER CNC- FINLAND	Shearing Machine
ORMA ITALY Puffing Machine	KLIMA Bullet Expansion Machine
KLIMA FINPRESS TAIWAN	EOT Crane
OMS Hairpin Bending Machine	Galileo Gas Charging Machine

FIN PRESS

AMADA Bending Machine

Manufacturing Strengths- Machinery- Mangalore, INDIA

Amada CNC– Japan	Welding Machines (7 Nos)
AMADA CNC Tools Set	Compressors (7 nos)
Hindustan Hydraulics – Bending	Shearing Machine (2 nos)
De-coiler- 2 NOS	Bullet Expansion Machine
ORMA Puffing Machine	EOT Crane
Finpress (2 Nos)	ORMA Puffing Machine

Bullet Expansion

Puffing Machine

Quality Assurance

An ISO 9001:2015, 45001:2018, 14001:2015 Certified company

Regular review of production drawing manual, software & in-site if required; frequently calibrated measuring tools

Aiding clients with guidelines as per OEM for installation

Incoming & outgoing material inception

Strictly follows approved MTC & MSDS

Follow the 5S principles on products & production software

Frequently follows quality assurance for ISO auditing

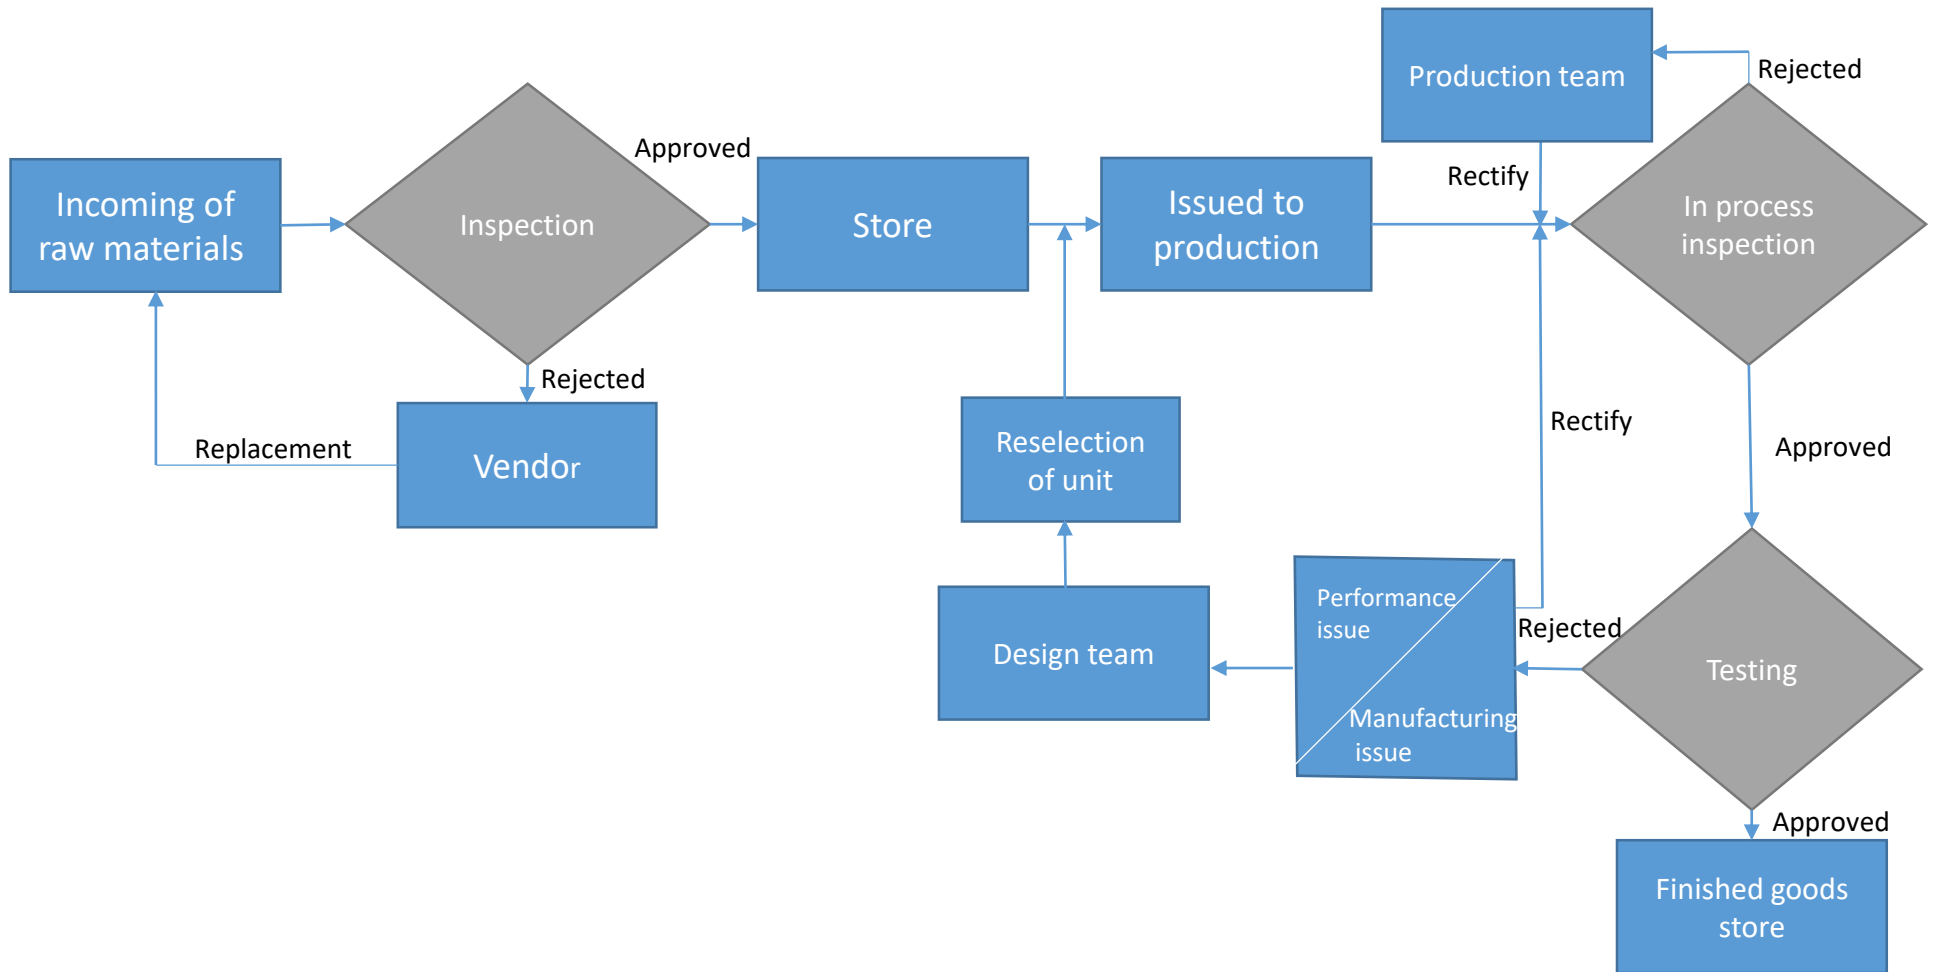

Regular checks and maintenance of all machinery

Complete in-house testing

Use of quality measuring tools (Elcometer, Bevel Protractor, Micrometer, Digital Vernier Caliper, Pitot Tube Anemometer)

Quality Process- Flowchart

Software Strength

We employ the best-in-class software to aid in our manufacturing processes for higher efficiency, quality & precision.

It includes:

SIEMENS Solid Edge- Solid Edge from Siemens provides next generation product development for today's engineers. Best-in-class mechanical, electrical and PCB design & fully integrated simulation analysis.

UNILAB Coils Software- A professional software to finalize the most complex projects, with powerful tools which includes specific features for the HVAC market. The calculation results in a very high level accuracy in both capacity & pressure drops allowing to certify heat exchangers, fan coils or Air Handling Unit with Eurovent & AHRI at the first attempt, validated by experimental data & consolidated Customer Satisfaction.

AUTO CAD- Employs the latest version of AutoCAD (2024); Allows to design faster with an industry-specific toolset for mechanical engineering including 700,000+ intelligent parts and features.

VISUAL AHU - Our unique 3D visualization software allows for the creation and rapid selection of user created components through customizable databases. This Manufacturing software turns sales into production as a full Bill Of Materials is created and detailed through AutoCAD drawings with a possible link to CNC and MRP software.

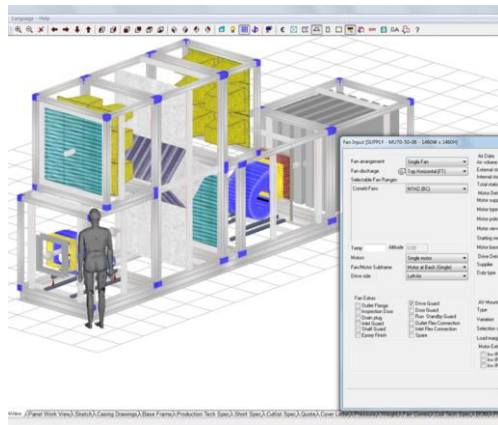

Software Strength

AMADA AP 100- For AMADA CNC machine, the intelligent interface to convert manufacturing drawing in to sheet metal parts

JETCAM- For CNC machine, the easy and common interface to convert the drawing to sheet metal parts

SAP- Engineering solution to fuel innovation & foster equality. It consists of a number of fully integrated modules, which covers virtually every aspect of business management.

Production Strength

Complete in-house production and testing

Capability of producing 150-300 units/month (AHU, FAHU, Ecology units & Condensing units) of major air side equipment, 3000-5000 no's (FCU, VAV, Duct heater) of air side terminal units

2-3 Flexible work shifts to meet the production demand

Highly skilled & trained workers

Successful management by grouping skilled & semi-skilled workers based on their specialized training and area of expertise

Specialized supervision in all areas of production

Production Capacity

Products	Quantity	Capacity/Year
AHU/Ecology	CFM	15,800,000 (3950 Units)
FCU	Numbers	52,000
Coil	Square Feet	200,000
Condensing Units (10-25 TR)	Numbers	3,000
Fire Hose Cabinets	Numbers	25,000
VAV	Numbers	15,000
Control Panel	Numbers	6,000
Duct Heater	Numbers	4,000

Engineering- Design Strength

We have the strong back up of an expert Engineering & Design team and a legacy of experience that spans to 25 + years

We provide optimized designs with low footprint area

Possess the skill and expertise to come up with highly customized design solutions to fit the customer needs perfectly

Low capacity – High capacity product range

Reduced noise level series

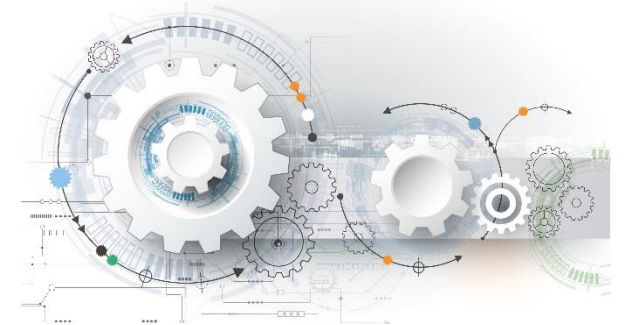

Design based on space consideration for easy operation and maintenance

Supporting with permanent solution for cooling & dehumidification.

Engineering support and on-site assistance

Supporting client with demand control system with any sort of logic in control panel programming.

Reduced power consumption, aiding the client to achieve ROI sooner

Application- Advisory/Consultative Assistance

Expert Assistance

We have an expert Application team to assist our customers in choosing the right product offerings. The consultative approach ensures that we understand and prioritize the customer needs by effective probing and drilling down. By aiding in creating a need based solution for the customers, we ensure that they get the maximum satisfaction from our end.

Consultative Approach

The transition from product based to need based selling has also given us an edge since it provides us with effective feedback from the customers; our application team is constantly listening to the market needs, changes and opinions which are then reflected in our offerings and solutions.

After Sales Support

We are committed to a culture where we not only supply products but also promote an environment wherein our people make all the difference even after sales. We hear, we support, we understand , we develop and we maintain our products and relationships.

With almost 2 decades of creditable experience in the HVAC industry, our customers can experience and benefit from the expertise and technical support at all stages. From design, selection, to supervision on commissioning and beyond, we make sure your cooling systems reduces your total cost of ownership, whilst providing maximum sustainability and longevity.

To serve you better and always, we have 2 fully equipped service vehicles available on call 24x7 as well as an Online Service Portal for complete ease and convenience.

We also maintain a full spare parts support system for our customers.

Service Support- Choose your Service Type

We bring forward the best and convenient After Sales & Services support for our customers, who can choose their level of service type from:

- **Round the Clock availability on Call**
- **Online Service Portal**
- **Walk-in to our Offices**

We have our large team of highly skilled service engineers and maintenance personnel to provide you high quality service support at your convenience.

Partners Associated

We have partnered with some of the best and reliable names in the industry for the supply of high quality parts and components (as OEM):

All our Condensing units are powered by Emerson-Copeland Scroll compressors

We manufacture our high quality HVAC systems and Control Panel incorporating Schneider VFD & Control Panel Components

We integrate DELTA VFDs in our HVAC systems

Our HVAC equipment & Control panels employs the best of SIEMENS PIC Valves and SIEMENS component

Our HVAC systems employ BELIMO actuators

CERTIFICATIONS/STANDARDS

OUR CERTIFICATIONS

We manufacture Eurovent certified Air Handling Units, Fresh Air Handling Units & Ecology Units

الهيئة السعودية للمواصفات والمقاييس والجودة
Saudi Standards, Metrology and Quality Org.

We design and manufacture SASO certified Condensing units

All our Room Fan Coils are AHRI certified

هيئة الإمارات للمواصفات والمقاييس
Emirates Authority For Standardization & Metrology

We design and manufacture ESMA certified Condensing units

We are an ISO 9001:2015 ,ISO 14001:2015 & ISO 45001:2018 certified organization

An aerial photograph of a modern building with a glass facade. The building has a central courtyard area where several air conditioning units are visible. The text "PRODUCT PORTFOLIO" is overlaid in the center of the image.

PRODUCT PORTFOLIO

We offer a wide and broad spectrum of advanced & efficient Air Conditioning & Ventilation options

OUR COMPREHENSIVE RANGE OF PRODUCT OFFERINGS

Fan Coil Unit

- AHRI certified units
- District cooling or chiller
- ESP range from free blow ~ 150 Pa
- Extremely low noise level units
- Available in LN, SN, SK & CB Series
- 2 pipe or 4 pipe configuration available
- Coil number of rows ranges from 2-6
- GI casing well insulated & robust construction
- Includes Drain pans, Return air plenum and filters
- Vertical units are also available and provided with the same performance and energy efficiencies.

LN Series (High Static)
Single Skin

SN Series (Low Static)
Single Skin

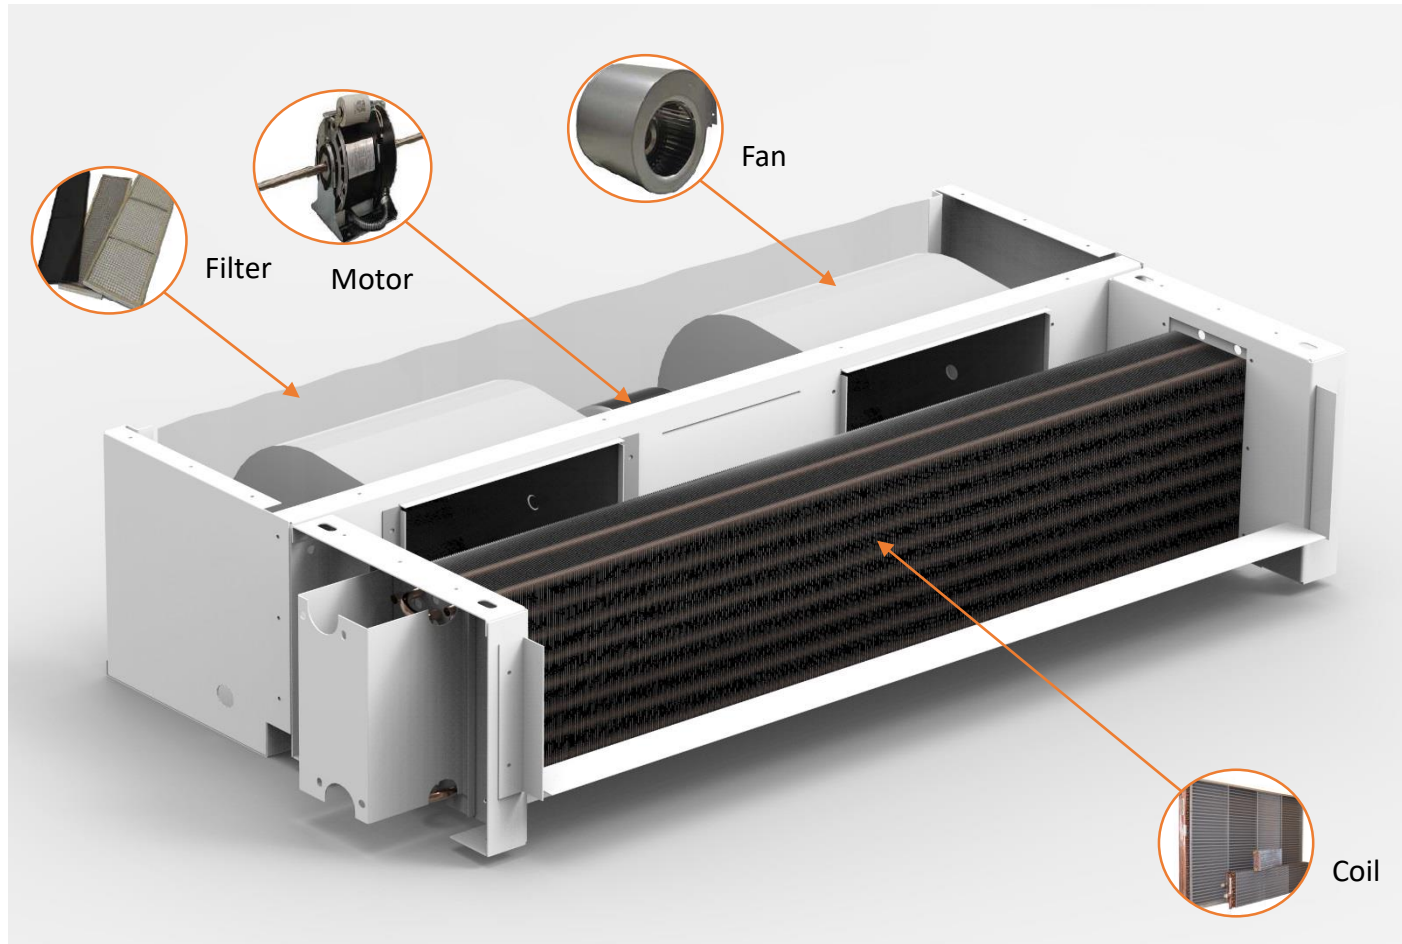

Double Skin
(LN / SN Series)

CB Series (Decorative)
LN / SN Series

Fan Coil Unit

Fresh Air Handling Unit

Eurovent Certified units

Heat recovery wheel (HRW)

Thermal break

Heat pipe dehumidification (HPD)

Plate type heat exchange

Enthalpy HRW & Sensible HRW

Heat pipe heat recovery

Maximum performance, energy efficiency and indoor air quality guaranteed along with operational efficiency and energy savings

Easy and safe installation and operation, with different configuration options and operational flexibility

Fresh Air Handling Unit – with flushed inbuilt Control Panel

Microprocessor based controller

Easy Start & Stop in auto mode

User friendly touch screen for easy monitoring of parameters in the system.

Remote system status monitoring (Internet remote connection as an option).

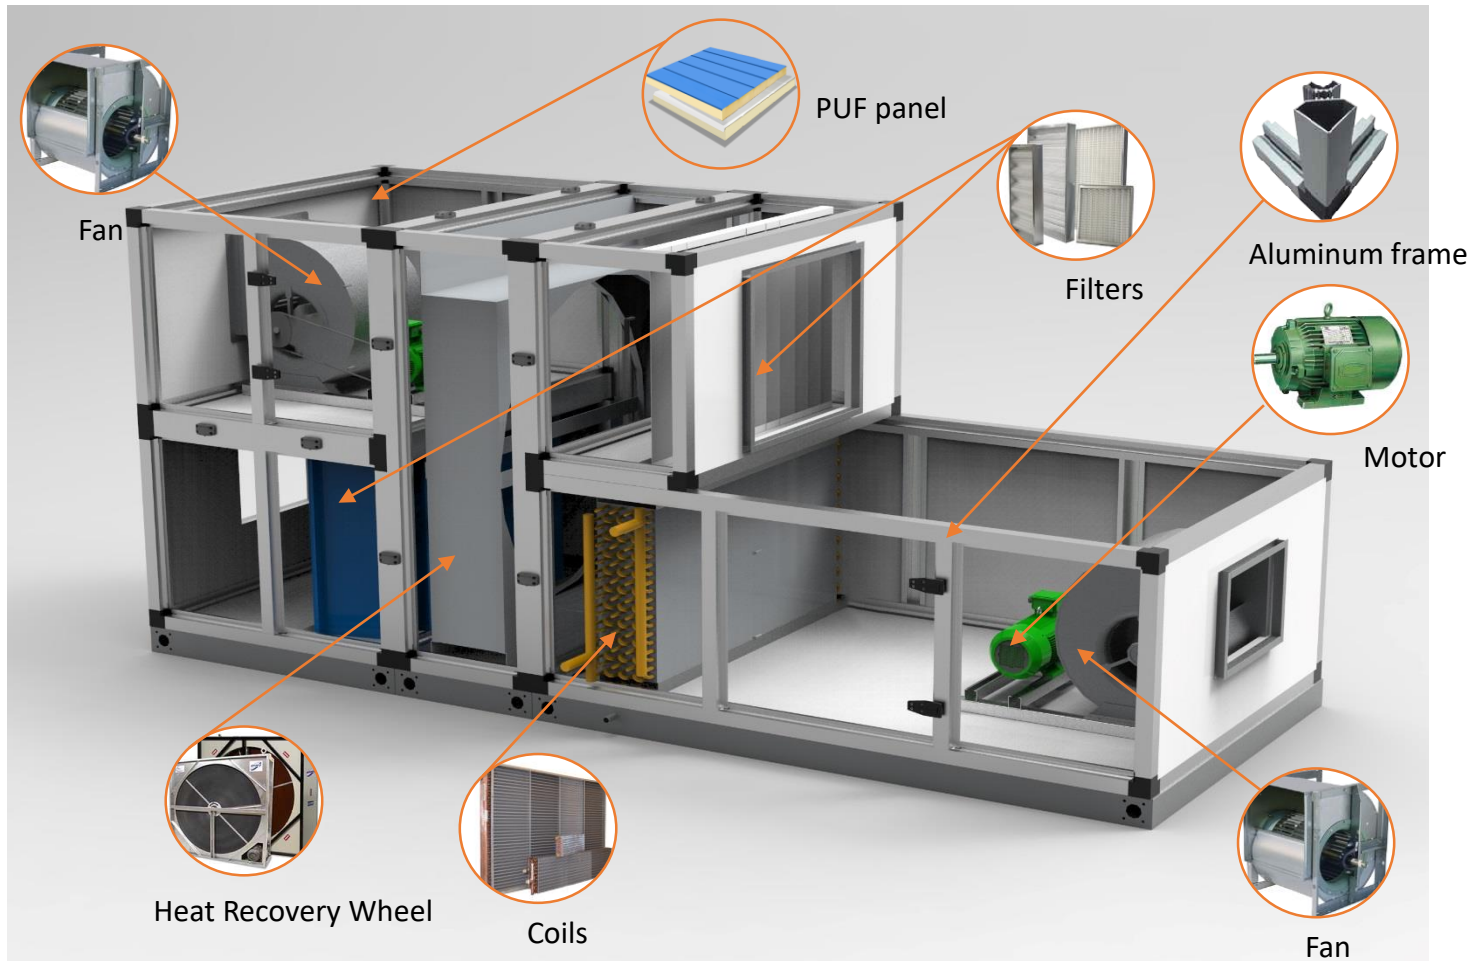

Monitor filter missing condition depending on the pressure drop across the filters and maintain the constant air flow

Monitors system and displays text messages for all alarms in the system & saving the all fault details in records

Flushed inbuilt
Control Panel

Fresh Air Handling Unit

Air Handling Unit, Floor Mounted Units, Ceiling Suspended Units

Available options include Horizontal Floor mounted Units and Horizontal Ceiling suspended units

All 50mm TB profile units are Eurovent Certified.

AHU and CSUs are manufactured with 25mm panel as well.

Vertical floor mounted units

Manufactured by integrating high quality components

Low noise units

Easy and quick installation

Compact designs to save space

Rigid design framework ensures high durability

High energy efficiency and compact design

Stainless Steel drain pan as per ASHRAE 62.2(Optional)

Suitable for Outdoor applications

SK Series (Ceiling Suspended)

Ecology Unit

- Ceiling Suspended and wall mounted
- Odor and smoke removal system
- Suitable for Kitchen exhaust and laboratory exhaust
- Complete filtration system with Blower incorporated
- Structure consist of anodized aluminum profile
- UL certified filters are as per EN 182 standards
- Compact design and easy maintenance
- Eliminates volatile organic compounds (VOC)
- Can sustain high temperatures which make it suitable for kitchen ventilation

Electrostatic Precipitator

- Single Pass / Double Pass
- Manual / Auto wash
- High efficiency, high frequency power supply.
- Easy to operate and can be automatic fault diagnosis tips
- Equipment stability, low maintenance rate
- Plate collector oil total area.
- Plate type electric field cleaning period.

Package Unit

Specially designed PHANTOM SERIES

Customized unit available

Double skin package unit

Thermal or Non-Thermal profile

Refrigerant : R22, R407C, R410A

Copper Fins & Phase Protector

Heat & Energy Recovery Unit

Compact design and low noise unit.

UL Certified filters

Cross flow type plate heat exchange

Low height design

Horse shoe type coil for Dehumidification

Heat Recovery Pipe for Heat Recovery

Air Cooled Condensing Unit

Nominal Capacity: 1 TR to 200 TR

Refrigerant: R22, R410, R407C,

High ambient and Single or Dual Hermetic sealed scroll compressors

Cabinets are constructed of heavily zinc coated galvanized steel

Cooling Coils

Range of copper tubes 3/8", 1/2", 5/8" coils

Fins: Aluminum fins, Hydrophilic or Pre-Coated Aluminum fins, Copper fins

Coating: Heresite & E-Kote

Condenser, Evaporator & Steam Coils
